

# Spring Music Festival at North High

## ARMOUR TRAINING

Army Pvt. Edward R. Renfro, son of Mr. and Mrs. Ray T. Renfro, 21714 Orrick St., Torrance, Calif., is receiving eight weeks of advanced individual armor training at Fort Knox, Ky. The training is scheduled to end May 12. Renfro is receiving experience in driving the Army's medium tank and is becoming proficient in firing the .30 and .50-caliber machine guns and the 90 millimeter tank gun. He entered the Army last January and completed basic training at Fort Lewis, Wash. The 23-year-old soldier attended Phineas Banning High School.

The 6th Annual Spring Music Festival presented by the North High School Department of music will be given Wednesday, April 26th at 8 p.m. in the North High Gymnasium.

The program opens with the mixed chorus, directed by Mr. Frank Small, singing "Some Folks Do," "Water Boy," "Adoramus Te," and "One Little Candle." The Saxon Orchestra follows with titled "Divertimento," "Aria: Marriage of Figaro," and "Russian Choral and Overture." The orchestra is directed by Mr. Robert Jones. "Tea for Two," "Somebody Loves Me," "Laura," and "I Fell Pretty" by the Girls Glee Club under the baton of Mrs. Marilyn Steele lend a

popular touch to the program.

The Saxon Concert Band, directed by Mr. Jones will play "Slavonic Dances" and "Light Cavalry Overture." Glenn Koohane will be featured as trumpet soloist in Sarry James' "Trumpet Rhapsody," while a flute of Linea Hileman, Linda Kirkpatrick, Janet D'Aloia, Jeane Kurz, and Yolanda Hanson will be soloists in the "Penny-Whistle Song" by Leroy Anderson. Mrs. Lyda Willis directs the Saxon Choir in some beautiful old standards. "I Love A Parade," "Over the Rainbow," "Stardust," and "Begin The Beguine." The program will conclude with all groups performing the "Festival Finale" by Maddy.

FLUTE QUINTET FEATURED—Linea Hileman, Linda Kirkpatrick, Janet D'Aloia, Jeane Kurz and Yolanda Hanson (left to right) will be featured in Leroy Anderson's "Penny-Whistle Song" at North High School Spring Music Festival, Wednesday, April 26, at 8 p.m.

## Christian Science Lesson Sermon

How hope is strengthened through spiritual understanding of the Bible will keynote the Lesson-Sermon on "Probation after Death" in all Christian Science services Sunday.

Paul writes in his epistle to the Romans (15:4, 13) "For whatsoever things were written aforetime were written for our learning, that we through patience and comfort of the scriptures might have hope. . . . Now the God of hope fill you with all joy and peace in believing, that ye may abound in hope, through the power of the Holy Ghost."

In a correlative passage from "Science and Health with Key to the Scriptures" Mary Baker Eddy says, "To understand God strengthens hope, enthrones faith in Truth, and verifies Jesus' word: 'Lo, I am with you always, even unto the end of the world.'" Later she affirms, "Not death, but the understanding of Life, makes man immortal." (pp. 446, 485) The Golden Text is from Revelation (3:5), "He that overcometh the same shall be clothed in white raiment."

**RHODODENDRONS**  
Remove the seed pods on Rhododendrons as they go out of bloom to strengthen the shrub.

## Inside Your Home

Your Decorating Problems Answered  
By BEN L. WALLACE, Decorator

Mr. Wallace: My Boy's bedroom is very small, yet he needs a place for his clothes, books, and a desk for study, he also needs a bed. Is there any way I can coordinate this room.

Wallace

Mrs. P. J. Lomita  
Mrs. P. J. Lomita  
Decorating a small room of this type can be quite a problem if not done correctly. I suggest you investigate the many fine wall mounted units that are on the market today. All in one unit these groups take very little space and can be used for both girls and boys rooms.

Mr. Wallace: What do you recommend for an entry hall that gets a tremendous amount of traffic, something besides carpet.

Mrs. G. Tozen, Torrance  
Mrs. Tozen: In a heavily traveled entry hall I recommend the use of Slate, or some form of stone, the results are practically permanent and in the long run it is your wisest investment. Recently on the general market is some very good Vinyl Tile

that has all of the appearance of stone, yet is quite inexpensive.

Mr. Wallace: I have heard of some kind of process used on fabrics that seals the pores or something, any way it makes fabrics almost child proof. Can you tell me what this is.

Mrs. Ted Johns, Lomita  
Mrs. Johns: I think that you must be referring to the scotch guard process that actually seals the fibers to resist soil and moisture. This process will generally last in the fabric up to three shampoos of material, it certainly helps prevent soil and makes it easier for the housewife to keep up. As far as being child proof there hasn't been any process invented that potent yet.

For you people that have Marble Tables, did you know that there is a new marble sealer on the market. It is manufactured by Watco Co. and it is easy to apply and literally makes your marble stain proof.

Blues, Lavender, Olive Greens, and White is still the big color for this year.

Note: Send your Cards or letters to The Torrance Press, Care of Ben L. Wallace, 3233 Sepulveda Blvd., Torrance, Calif.

## Louis Zamperini Slated for First Methodist Church

At the First Methodist Church, El Prado Ave. and Manuel St., Torrance, at 7:30 p.m., Wednesday, April 26, Louis Zamperini will be the guest speaker.

The war experience of Captain Louis Zamperini was recognized by the US Air Force Public Relations Dept. as one

of the best and most exciting stories to come out of World War II.

Zamperini was an Olympic track star and world's champion miler. While attending the University of Southern California, he broke the national collegiate record and held it for more than 15 years.

## Research Detector Installed for Space Radiation Effects Study

Northrop Corporation recently announced plans to install a TRIGA Mark-F research reactor at the company's Norair Division in Hawthorne to simulate radiation conditions which might be encountered by advanced space vehicles, their crews and equipment.

General Atomic Division of General Dynamics Corporation will provide the reactor.

The basic TRIGA is used in hospitals and on university campuses throughout the world. Northrop will employ the Mark-F model in the company's new Space Radiation Facility, where it will be used to study radiation effects such as might prevail in the vicinity of solar flares, the Van Allen radiation belts, or aboard nuclear-powered vehicles.

**RADIATION FACILITY**  
The \$750,000 Space Radiation Facility is scheduled for completion in late 1961 or early 1962.

The reactor will have two special, Northrop - specified features:

The pool of de-mineralized water which shields the reactor core will be oversized, so that capsules containing full-size missile and space vehicle parts and electronic systems can be immersed in it for exposure to radiation.

A large dry exposure room will be constructed adjacent to the reactor pool. This room will accommodate evacuated chambers for simulation of the vacuum of space. An aluminum window will separate it from the reactor pool.

Northrop's TRIGA Mark-F will have a steady-state energy level of 100 thermal kilowatts.

In addition to studying the behavior of vehicle components, materials and electronic subsystems when exposed to radiation, the reactor will be used for radioisotope production and for basic neutron physics research.

The reactor's movable core may be operated at any point along the 18-foot length of the reactor pool. The pool will be approximately 21 feet deep and 10-feet wide.

**SELF-LIMITING**  
Radiation emitted by the TRIGA Mark-F is self-limiting because of the built-in safety characteristics of the TRIGA's fuel-moderator elements of uranium-zirconium hydride. These fuel-moderator elements are, in effect, a built-in control that automatically and instantaneously returns the reactor to normal operating levels following any rapid increase in power, even if external control de-

vices are removed. Reactor personnel are able to work directly above the reactor top in complete safety.

TRIGA reactors are used by universities, hospitals and research centers in big cities and small towns on five continents.

**IN OPERATION**  
In the United States, TRIGA's are in operation in the Veterans Administration Hospital in Omaha, Nebraska; National Naval Medical Center, Bethesda, Maryland; Cornell University, Ithaca, New York; University of Arizona, Tucson; University of Illinois, Champaign-Urbana; Kansas State University, Manhattan; and at General Atomics's plant near San Diego. In January, Columbia University ordered a TRIGA for its campus in New York City, and funds are being raised for one at San Diego State College.

It was during the 1936 Olympics in Berlin that he almost created an international incident when he tore down the Swastika from in front of Hitler's Chancellery.

During World War II he was better known as the Army Air Force Captain who crashed at sea and spent 47 days adrift on a small rubber life raft (longest in the history of the Armed Forces) and 2 1/2 years a P.O.W. in Japan. In a starving condition he was forced to compete against well fed Japanese runners.

Due to his disappearance and consequently being "officially declared dead," he now has an Army Air Field named in his honor, and an athletic event at the Madison Square Garden, New York.

For more details of his life and how he became a Christian worker with delinquent boys, be sure to attend the service at the First Methodist Church, said one of the spokesmen of the church.

**PLANT DAHLIAS**  
Plant Dahlias, if you haven't already. Set out bedding Dahlias from nursery flats, also.

## Realtors Score Heavily in Civic Activities for Community Welfare

Although a number of Realtors are already giving their time and skills to constructive civic undertakings in Torrance, members of the Torrance Lomita Board are encouraged to increase this activity in the future," Delbert Vaughn, president, declared today.

This statement of Del Vaughn came as Realtors of Torrance and Lomita prepared to celebrate City Dad's Day as a part of their observance of National Realtor Week, April 23-29.

"Naturally we are proud of our members for their service to the betterment of our community," the Board executive said. "Such unselfish activities are in line with the spirit and the letter of the Code of Ethics of our National Association of Real Estate Boards. They are tangible evidence of the professional approach of Realtors to the real estate field—proof of the fact that the interest of our members in Torrance and Lomita transcends the mere sale of real property."

As examples of the community service of local Realtors, Vaughn pointed out that Kenneth M. Miller is a member of the Torrance Planning Commission, while Nicholas O. Drale is a member of the city council.

Rose Craig is a member of the Park and Recreation Commission and Hallie Crow is a member of the L.A. County Library Commission.

Active in civic and service club affairs are C. J. Ryan, chaplain of the American Le-

gion Post 170, and Stanley Heiman, commander of the American Legion Post 170.

"The important thing about this record of Realtors' civic service is that in many cases it represents the use of specialized skills in the fields in which Realtors are best qualified to help their city," Vaughn said. "It is concrete evidence of the genuine interest of Realtors in the community in which they do business."

### LEGAL NOTICES

#### CERTIFICATE OF BUSINESS, FICTITIOUS NAME

The undersigned do hereby certify that he is conducting a business at 3233 Sepulveda Boulevard, Torrance, California, under the fictitious name of GURREY MORTGAGE COMPANY and that said firm is composed of the following persons, whose name in full and place of residence is as follows:

RICHARD B. GURREY, 64 Depplegray Lane, Rolling Hills Estate, California.

Dated April 6, 1961

R. B. GURREY  
State of California, Los Angeles County.

On April 6, 1961, before me, a Notary Public in and for said State, personally appeared Richard B. Gurrey known to me to be the person(s) whose name(s) is subscribed to the within instrument and acknowledged he executed the same.
